June 2017 Newsletter

The month of June is a month that brings multiple things. For some it marks the beginning of BBQ season. For others, June marks the opening of pool season. For the majority of school aged children June means "Freedom!"

The month of **June marks the beginning of summer break for millions of kids in the U.S.** The idea of a summer break is not unique to the United States with virtually every country taking between 2-3 months off. This idea of a summer break is a relatively new one within the educational system. In 16th Century England, boys would attend school from 6 A.M. to 5 P.M. six days a week. They were allowed two hours for lunch. The ancient Romans required schooling of select children to be seven days a week. The school day for these children would span from sun up to sundown. Many things have influenced the school calendar through the years. Things such as an agrarian economy, climate controlled rooms, government mandates, and cultural expectations have shaped what a summer break has come to be.

The public schools in Salina have recently been let out on summer break. With this said we at Salina Concrete Products (SCP) have noticed an abnormally large influx of kids moving throughout the neighborhood. Kids have been walking, running, and riding by the office and through the yard much more than in past years. We at SCP have tried to redirect this traffic in every way possible for the safety of the kids.

However, it is not likely that our efforts will completely stop all kid traffic before they return to school the second week of August. With this said we at SCP would ask all customers, vendors, suppliers, and anyone else on the SCP property to be mindful of this. **When operating vehicles and/or equipment around the SCP property please be continually watching for children. For the safety of the kids we greatly appreciate your help with this.**

As always, we thank you for your business and continued support.

Best regards,

Peter Browning
General Manager
